

## PRIMROSE SCHOOLS

Jarbou Ronnisch Construction has partnered with Primrose Schools to deliver high-quality, purpose-driven early childhood education facilities.

In Canton, Michigan, we completed a 12,500-square-foot ground-up school for a local family investing in their business and community. The facility features a thoughtful mix of classroom, play, and outdoor space designed to support early learning and development.

Building on that success, we are currently serving as Construction Manager for a second ground-up Primrose School in Rochester Hills. This 13,550-square-foot facility includes specialized infant and toddler classrooms, a full kitchen, welcoming reception area, and dedicated playground, with completion anticipated in June 2025.

Together, these projects reflect our strong partnership with Primrose Schools and our commitment to creating environments that support Active Minds, Healthy Bodies, and Happy Hearts.
