

BANK OF ANN ARBOR

Jarbou Ronnisch Construction has provided full-scope renovation and new-build services for the Bank of Ann Arbor across key branches in Birmingham, Bloomfield and Bloomfield Hills, MI. Working within the framework of the bank's evolution from Bank of Birmingham into Bank of Ann Arbor, we have upgraded interior banking floors, refreshed teller and lobby areas, enhanced drive-through and ATM infrastructures, and aligned MEP systems with contemporary standards. These projects reflect our capability to support financial-institution clients during periods of re-branding and expansion, ensuring each branch delivers an elevated member experience, operational efficiency, and a consistent brand presence across the network.
