

EMAGINE ENTERTAINMENT & STAR LANES

In order to complete the project within the very aggressive eight-month construction schedule, Ronnisch Construction Group was in constant communication with our subcontractors, the owner's, vendors, suppliers and City of Royal Oak officials and inspectors. An extensive coordination effort went into the installation of special systems such as: the bowling alley equipment, video/sound systems, bar with remote beer cooler, stadium/special seating and theater screens. In addition to breathing new life into the property, the building also achieved LEED certification with the help of a solar power system installed on the roof that feeds power to the building.
