

GREEN WAY AUTO WASH FENTON

GreenWay Auto Wash in Fenton, Michigan, is a 4,172 square foot facility designed with cutting-edge technology and a strong commitment to environmental sustainability. The car wash features an innovative over/under conveyor system that includes a manual high-pressure pre-wash prep performed by staff, ensuring every vehicle receives a thorough and meticulous initial wash. GreenWay Auto Wash exclusively uses eco-friendly premium soaps and waxes, providing effective cleaning and protection while minimizing environmental impact. The facility also boasts a Bio Complete Water Restoration system that removes soaps, waxes, and dirt from used water, allowing it to be recycled and reused. This advanced system significantly reduces water consumption and waste, aligning with GreenWay's dedication to sustainability.
