Construction

LORIENT CAPITAL

Jarbou Ronnisch Construction was selected as the Construction Manager to construct Lorient Capital's new Birmingham office location. The Jarbou Ronnisch team worked closely in conjunction with the landlord, Biddison Architecture + Design, as well as the owners of Lorient Capital. The cooperation and teamwork resulted in a remarkable 5,700 square-foot space in the upscale, downtown community of Birmingham, Michigan. The triangular-shaped layout included some of the finest design work in the area. Frameless glass walls and sliding glass doors create perimeter offices that allow for natural light throughout the space. Key features included an open employee lounge and lunch area, several glass-walled conference rooms, cable-hung LED lighting, and square recessed light fixtures. Quartz countertops sit on custom cabinetry and custom-selected, custom-finished wood doors sit in the executive area. The space boasts exquisite detail throughout, combining new and existing surfaces – creating a striking, contemporary, office environment.
