

MICHIGAN FIRST CREDIT UNION

Ronnisch Construction partnered with Michigan First Credit Union on multiple branch- and facility-level projects across Southeast Michigan including Lathrup Village, Detroit, Bloomfield Hills and Eastpointe, MI. Our team completed full-scale renovations and build-outs that enhanced member-facing spaces, optimized branch operations and updated mechanical, electrical and interior finishes to align with MFCU's progressive "financial store" model. For example, at the Lathrup Village headquarters-expansion we supported the transition to a flexible, tech-enabled member environment. These projects underscore Ronnisch's ability to execute precision-tailored branch builds for growing financial institutions — delivering consistent quality, brand alignment and community-centric service environments.
