

URBAN AIR

Ronnisch Construction served as the general contractor for the Urban Air build-out in Sterling Heights, MI, transforming a large commercial space into a high-energy indoor adventure park. Our team managed the full renovation, coordinating structural modifications, specialized installations, and interior finishes to accommodate attractions like climbing features, trampolines, party rooms, and guest-service areas. With careful scheduling, tight coordination with specialty vendors, and a sharp focus on safety, we delivered a dynamic, family-friendly destination that aligns with Urban Air's national brand standards while meeting the needs of the local community.
