BARTON HILLS COUNTRY CLUB

Jarbou Ronnisch Construction is proud to continue its long-standing partnership with Barton Hills Country Club, serving as Construction Manager for a series of phased renovations across the club's campus. As a valued repeat client, the club once again selected Jarbou Ronnisch to deliver complex improvements that enhance member amenities while maintaining uninterrupted operations.

The multi-phase work includes renovations to the pool clubhouse and locker rooms, construction of a new outdoor pavilion and bar, interior upgrades to the dining area and bar, ongoing locker room renovations, and the installation of an emergency back-up generator to support long-term resilience. A standout feature is the heavy-timber pool pavilion, craned into place over an existing structure due to site constraints, reflecting careful planning and precision execution within an active, high-end facility.
