BLOSSOM CHILDREN'S CENTER

Jarbou Ronnisch Construction was selected to deliver multiple projects for Blossom Children's Center, including their 33,000 square foot flagship location in Brighton, as well as facilities in Canton and Novi, Michigan. When Blossom expanded west to Brighton, Jarbou Ronnisch partnered with the team to construct a purpose-built facility designed to support high-quality, interdisciplinary therapy in a collaborative and family-focused environment. The Brighton location features innovative therapy spaces, including a pretend play neighborhood with simulated restaurants, dental offices, and medical offices, thoughtfully designed to help children engage with real-world scenarios in a safe, supportive setting. Each project reflects Blossom's commitment to serving the special needs community and Jarbou Ronnisch's ability to deliver specialized, community-focused facilities.
