

LIFE SKILLS AUTISM ACADEMY

Ronnisch Construction Group served as the Construction Manager for the Life Skills Autism Academy in Harper Woods, Michigan. The project involved the construction of a specialized early intervention facility designed to support Applied Behavior Analysis therapy in a structured, school-like environment. The space was carefully coordinated to meet the functional and safety needs of students, staff, and families, with adaptable learning areas and durable finishes throughout. Through close collaboration with the project team, Ronnisch delivered a purpose-driven facility that supports learning, growth, and community impact.
