NORTH AMERICAN BANCARD

North American Bancard acquired a 105,000 square foot building in a suburban office complex, relocating over 300 employees. Jarbou Ronnisch led a complex renovation project aimed at creating an energetic workspace while avoiding disruptions to daily operations. The renovated space now includes open, collaborative work areas, a dedicated call center, and inviting social zones. Vibrant elements like graphic designs and three-dimensional installations add dynamism, complemented by choreographed light projections. The executive suite received a sophisticated makeover with rich textures and patterns, maintaining a contemporary yet dignified atmosphere. Additionally, employee amenities were enhanced with breakout areas, lounges, and recreational spaces, providing opportunities for relaxation and rejuvenation. The revamped office space fosters productivity, collaboration, and employee satisfaction in a modern, dynamic environment.
