

OUR LADY QUEEN OF MARTYRS

When Our Lady Queen of Martyrs sought to make major improvements to their worship area, narthex, and ancillary areas, they chose Jarbou Ronnisch Construction to provide Construction Management services. In close cooperation with the Church hierarchy, Ronnisch Construction Group completely re-furnished the primary worship areas of the Church facilities. The work included the removal, refurbishment, and reinstallation of the pews, the re-work of the stair systems leading to the altar, demolition of the flooring systems, and the demo and re-work of the ceiling systems. Replacement materials included new chandeliers, track lighting, and down lights, hard tile and carpet throughout the area, a new lighting control system, and other paint and finish upgrades. Unique features included the installation of a full-length marble wall treatment, upgrades to the mother's room, ushers' room, restroom facilities, candle room, and library. Other improvements included new baptismal fonts and statue stands, completing the upgraded altar area.
