ADIENT

Since 2016, Ronnisch Construction Group has served as the construction manager for Adient, overseeing multiple renovation projects to enhance their facilities. Our work has included the renovation of employee offices, restrooms, break rooms, and the front entrance/lobby, creating a more modern and functional workspace. Beyond interior upgrades, Ronnisch has reconfigured and repaved the parking lot, incorporating the latest EV charging stations to support sustainability initiatives. Each project has been executed with minimal disruption to operations, ensuring a seamless transition for employees.
