

ST NICHOLAS GREEK ORTHODOX CHURCH

Jarbou Ronnisch Construction was privileged to be selected as the Construction Manager for St. Nicholas Greek Orthodox Church's expansion and renovation in Troy, Michigan. The church embarked on major facility improvements that included the addition of a 3,000 sf community/youth center, the renovation of two office/meeting room wings on either side of the new construction area, and a 2,800 sf expansion for storage and operational elements. The community center features a dramatic wood-lam timber structure, creating an open and inviting area. Other improvements include new areas for linen storage, a new walk-in cooler, and other associated storage areas. The space also included showcase millwork, new flooring, wall treatment, and lighting elements.
